

## 7.0 Installation Preparation

For best results apply a continuous strip to the floor the length of the long axis of the mat and in the center of the mat. In addition, before applying to the floor or decking the surface needs to be:

- Clean to the base floor surface of loose dirt, oils and grease
- Dry of all moisture, grease or oils
- Smooth
- Floor surface warmer than 40° F (4° C)

### Specific Applications Instructions

1. Make sure the floor is clean of all loose dirt, sealer/paint, concrete or rust. Reseal or paint if needed.
2. Clean away all oil and grease residue if present to the base surface and let dry completely.
3. Lay out mat in desired area.
4. Determine the mid-point on the short side of the mat and mark the floor at both ends.
5. Roll-up the mat and move it out of the way.
6. Peel back four (4) inches of liner and apply the tape to the floor at one of the marks so that the tape unrolls towards the other mark.
7. Unroll the tape to the other mark.
8. Peel back the liner as you press the tape to the floor. Try to keep the tape straight between the marks.
9. Roll the mat back into place.
10. Walk down the mat over the area taped.
